Joint Proposal to Acquire NYSE Euronext

NASDAQ OMX and IntercontinentalExchange, Inc. ("ICE") remain committed to pursuing their joint proposal to acquire NYSE Euronext given the benefits to the stockholders of all three companies. The NASDAQ OMX/ICE proposal provides NYSE Euronext stockholders with a strategically attractive alternative to the Deutsche Boerse proposal, with exposure to two focused players in equities and derivative exchanges. The joint proposal, which represents a 20% premium to the existing Deutsche Boerse proposal, also offers stronger potential upside given the superior growth prospects and the realizable combined synergies of \$740 million annually from companies with proven track records of achieving synergies and successfully integrating technology in previous acquisitions.

Under the terms of the NASDAQ/ICE proposal, NYSE Euronext stockholders would receive \$14.24 in cash, plus 0.4069 shares of NASDAQ OMX common stock and 0.1436 shares of ICE common stock for each NYSE Euronext share. As part of the proposal, ICE would purchase NYSE Euronext's futures businesses, and NASDAQ OMX would retain NYSE Euronext's remaining businesses, including the NYSE Euronext stock exchanges in New York, Paris, Brussels, Amsterdam and Lisbon, as well as the U.S. equity options business.

Ron Hassen, Interim Chief Financial Officer, said:

"A combination of exceptional operational performance and effective capital management decisions resulted in NASDAQ OMX growing earnings per share by 42% over prior year results. The highlight of the quarter was the strength of our revenues, which were at their highest levels ever. When coupled with the successful integrations of our recent acquisitions, NASDAQ OMX is poised to realize continued growth."

Expense Guidance

Total run rate operating expenses for the full year of 2011 are expected to be in the range of \$895 million to \$915 million, excluding approximately \$50 million in merger related and other infrequent charges.

Financial Review

Revenues

Revenues less transaction rebates, brokerage, clearance and exchange fees ("net exchange revenues") were \$415 million for the first quarter of 2011, an increase of \$15 million, or 4%, from the fourth quarter of 2010 and an increase of \$55 million, or 15%, from the first quarter of 2010. Changes in the exchange rates of various currencies as compared to the U.S. dollar had the impact of increasing revenues in the first quarter of 2011 by \$5 million when compared to the fourth quarter of 2010, and by \$10 million when compared to the first quarter of 2010.

Market Services

Market Services net exchange revenues were \$281 million for the first quarter of 2011, up 6% when compared to the fourth quarter of 2010 results and up 17% when compared to the first quarter of 2010.

Transaction Services

Net exchange revenues from Transaction Services were \$195 million for the first quarter of 2011, an increase of \$13 million, or 7%, when compared to the fourth quarter of 2010, and an increase of \$40 million, or 26%, when compared to the first quarter of 2010.

- Total net cash equity trading revenues were \$62 million for the first quarter of 2011, up \$2 million, or 3%, from the fourth quarter of 2010, and up \$7 million, or 13%, from the prior year quarter.
 - Net U.S. cash equity trading revenues increased \$2 million when compared to the fourth guarter of 2010

due to higher industry trading volumes, which were up 4% from fourth quarter of 2010 levels, offset somewhat by lower market share. Net revenues increased \$7 million when compared to the prior year quarter due primarily to modified rates, offset somewhat by lower trading volumes.

- Included in U.S. cash equity trading revenues in the first quarter of 2011 are \$66 million in SEC Section 31 fees, compared with \$57 million in the fourth quarter of 2010 and \$55 million in the first quarter of 2010. Corresponding cost of revenues, reflecting the reimbursement of these fees to the SEC, is included in brokerage, clearance and exchange fees.
- European cash equity trading revenues were equal to results from the fourth quarter of 2010 and the first quarter of 2010, as increases in trading activity were offset by lower average fees.
- Total net derivative trading and clearing revenues were \$80 million for the first quarter of 2011, up \$6 million, or 8%, from the fourth quarter of 2010 and up \$19 million, or 31%, from the prior year quarter.
 - Net U.S. derivative trading and clearing revenues increased \$6 million when compared to the fourth quarter
 of 2010 and \$15 million when compared to first quarter of 2010 revenues. The increase when compared to
 the fourth quarter of 2010 is primarily due to higher volumes and an improvement in the average fee
 realized. The increase when compared to the first quarter of 2010 is driven by higher market share and
 higher industry volumes.
 - European derivative trading and clearing revenues were equal to results from the fourth quarter of 2010, but increased \$4 million when compared to the first quarter of 2010. When compared to the fourth quarter of 2010, the favorable impact from increases in derivative trading activity and changes in the exchange rates of various currencies as compared to the U.S. dollar were offset by the negative impact from lower clearing volume for energy derivative products. The increase when compared to the first quarter of 2010 is due to higher trading and clearing volumes for options, futures and fixed-income products. Also contributing to the increase are changes in the exchange rates of various currencies as compared to the U.S. dollar.
- Access Services revenues were \$53 million for the first quarter of 2011, an increase of \$5 million, or 10%, when compared to the fourth quarter of 2010 and an increase of \$14 million, or 36%, when compared to the prior year quarter. The increase in revenues when compared to the fourth quarter of 2010 is primarily due to the acquisition of FTEN, which was completed in December 2010. The increase when compared to the first quarter of 2010 is due to continued demand for our services and to the acquisition of FTEN.

Market Data

Market Data revenues were \$81 million for the first quarter of 2011, up \$2 million, or 3%, when compared to the fourth quarter of 2010, and up \$1 million, or 1%, when compared to the first quarter of 2010.

- Net U.S. tape plans revenues were \$27 million in the first quarter of 2011, down \$1 million when compared to revenues in the fourth quarter of 2010, and down \$4 million, or 13%, when compared to the prior year quarter. The reduction in revenues when compared to both periods is due to lower plan shareable revenue and to declines in trading and quoting market share of U.S equities, as calculated under the SEC-mandated market data revenue quoting and trading formula.
- U.S. market data products revenues were \$32 million in the first quarter of 2011, equal to revenues reported in the fourth quarter of 2010, but up \$1 million, or 3%, when compared to the prior year quarter. The increase in revenues when compared to the first quarter of 2010 is driven by the growth of new products such as BX TotalView, options data feeds, and global access products, partially offset by discontinued products.
- European market data products revenues were \$22 million in the first quarter of 2011, an increase of \$3 million, or 16%, when compared to the fourth quarter of 2010, and an increase of \$4 million, or 22%, when compared to the prior year quarter. The increase when compared to both periods is primarily due to modified fees for market data products, higher audit revenues, and to changes in the exchange rates of various currencies as compared to the U.S. dollar.

Issuer Services

Issuer Services revenues were \$91 million for the first quarter of 2011, an increase of \$2 million, or 2%, when compared to the fourth quarter of 2010, and an increase of \$7 million, or 8%, when compared to the first quarter of 2010.

Global Listing Services

Global Listing Services revenues were \$78 million for the first quarter of 2011, up \$1 million, or 1%, when compared to the fourth quarter of 2010, and up \$6 million, or 8% when compared to the first quarter of 2010. The increase when compared to the fourth quarter of 2010 is due to higher European listing fees. When compared to the prior year period, revenue growth is primarily due to increases in Corporate Solutions revenues, resulting from higher demand for services from listed companies.

Global Index Group

Global Index Group revenues were \$13 million for the first quarter of 2011, up \$1 million, or 8%, when compared to revenues in the fourth quarter of 2010 and the first quarter of 2010. Higher revenues when compared to both periods are primarily due to increases in asset sizes of licensed ETFs as well as additional demand for new licensed ETFs and other financial products, partially offset by a decrease in volume for licensed derivative products in the first quarter of 2011.

Market Technology

Market Technology revenues were \$43 million for the first quarter of 2011, down \$3 million, or 7%, from the fourth quarter of 2010, but up \$9 million, or 26%, when compared to the first quarter of 2010. The decline when compared to the fourth quarter of 2010 is due to seasonally higher billable activity in the prior period. The increase when compared to the first quarter of 2010 is primarily due to the inclusion of revenue associated with SMARTS, which was acquired during the third quarter of 2010. Also contributing to the increase in revenues when compared to the first quarter of 2010 are revenues associated with recently delivered projects and changes in the exchange rates of various currencies as compared to the U.S. dollar.

Operating Expenses

Total non-GAAP operating expenses increased \$9 million, or 4%, to \$225 million in the first quarter of 2011 from \$216 million in the fourth quarter of 2010, and increased \$24 million, or 12%, from \$201 million in the prior year quarter. The increase when compared to the fourth quarter of 2010 is primarily driven by higher expenses resulting from the inclusion of expenses related to FTEN, which was acquired in the fourth quarter of 2010. Also contributing to the increase was the impact of changes in the exchange rates of various currencies as compared to the U.S. dollar, which had the effect of increasing expenses by \$4 million when compared to the fourth quarter of 2010. The increase when compared to the first quarter of 2010 is primarily due to higher expenses associated with FTEN, SMARTS (acquired in the third quarter of 2010), and Nord Pool ASA (acquired in the second quarter of 2010). Also contributing to the increase are changes in the exchange rates of various currencies as compared to the U.S. dollar, which had the effect of increasing expenses by \$7 million.

Net Interest Expense

Net interest expense was \$28 million for the first quarter of 2011, compared with \$24 million for the fourth quarter of 2010 and \$23 million for the first quarter of 2010. The increase in net interest expense when compared to both periods is due to the issuance of senior bonds in December of 2010 to finance the repurchase of shares. Included in total net interest expense for the first quarter of 2011 is \$24 million in interest expense and other related fees, \$4 million of non-cash expense associated with the accretion of senior and convertible notes, and \$2 million in amortization of financing costs related to convertible notes and bonds. Interest income for the first quarter of 2011 was \$2 million.

Earnings Per Share

On a non-GAAP basis, first quarter 2011 earnings per diluted share were \$0.61 as compared to non-GAAP earnings per diluted share of \$0.55 in the fourth quarter of 2010 and non-GAAP earnings per diluted share of \$0.43 in the prior year quarter. NASDAQ OMX's weighted average shares outstanding used to calculate diluted earnings per share was 181 million for the first quarter of 2011, 200 million for the fourth quarter of 2010, and 215 million for the first quarter of 2010.
